## Topics Discussed:

- We discussed about different methods we can use for our development process. Among Spiral , Agile, and Scrum method there is still time for discussion.
- We made decisions based on the information brought by each member about their specific tasks.
- Try to set the tasks and the objectives that must be fulfilled until the next meeting.

## Decisions Made:

- Blirona gave some example of existent dental clinic systems. Based on them we elaborated about the gaps those system had which we could fill in the one we will develop.
- All group members presented the tasks they were assigned to do. Xhoana explained about the functionality of Ajax and in which of the features we can use it.
- Inejda stated that the most suitable language for frontend design was CSS which was welcomed by all group members.
- Tea did a research about Structured Query Language which we will use for the database highlighting some useful functionalities we can use.
- Tomi was asked to look for different database platforms we may use. Among Xampp Wampp, and.... We decided to use Xampp as we were more familiar from the previews courses.
- Fiorela covered the task of Javascript which can actually be very useful in the page interaction with the users, in this case, patients. As it is a mixture of functional programming and object-oriented programming, it enables several features that can help us in our project. It will help a lot with making the project dynamic.

**Tasks Assigned:**

Fulfill the responsibilities of the role. Contact with the client to get a clear picture about the way the clinic functions. Prepare the document of the requirements specifying the problems the clients want to solve using the system. Be punctual for the next meeting.
